

Hello, trainees! The situation is tense. Let's begin. Your task is to complete all 4 training objectives ☒ to prepare yourselves for the Exam Mission and your future assignments.

Team Discipline and Adherence to Mission Priorities:

**Read all written information aloud while the others listen carefully. *Discuss any potentially valuable clue as a team, and decide all further actions collectively. *Within a guard's line of sight, avoid loud or sudden behaviour, entering houses, unauthorised boundary crossings, moving more than 2 metres from your team's suitcase, approaching within 1 metre of sector boundaries, and bringing two suitcases within 4 metres of each other. *Please be aware that if the guards come within close proximity to you, they may decide to check your documents, even if you have not engaged in any of the suspicious activities listed above. *Complete the following training tasks as efficiently and quickly as possible, carrying out only the required actions and avoiding any unnecessary activity.*

Cover and Communication with the Enemy:

**As your cover, we will use the Goebbels Film Competition, through which various Nazi-friendly screenwriters' associations periodically arrive in Le Arion to compete in writing the best screenplay for Hitler's next propaganda film. *We have prepared the necessary documents for you. Complete them with all required information. *At the main gate in Sector E15, present your documents to the German guards and maintain your cover as Nazi film screenwriters to enter the city.*

Orientation in the City and Legal Movement Between Districts:

**Upon entering the city, remain within Sector 47E  and find a suitable place to study the city map to determine your location, the cardinal directions, and the map's orientation. *The red-and-white lines on the map  mark gates through which you can also legally enter other sectors by waiting for a guard and requesting permission to cross the border. *The white dotted lines with arrows on the map  mark secret passages.*

Border Crossing, Hiding and Psychological Resilience:

**Proceed from District 47E to Sector R3. There, locate the hidden Tavern door code. It may prove useful later. *Before setting off, draw your chosen route on your map. *Your route must include: one legal border crossing + one illegal border crossing through a gate + one border crossing through a secret passage.*

Examination Mission - Analysis and Interpretation of Clues:

Congratulations on completing your training. Here is the information for the Exam Mission: The Resistance had managed to obtain one of the Nazi **Cipher System Calculators**, but its handover to MI6 failed, and it has now fallen back into Nazi hands. Fortunately for us, it is still located in Le Arion, locked inside the safe of a German officer, and we have a plan for how to recover it with your help. This officer is a secret art lover and keeps a very valuable painting in the same safe. Thanks to our comrades in the resistance movement, we know that under the right circumstances he has a weakness for showing it off. And so your mission begins. Members of the Resistance have written the title and the artist of this painting somewhere in the city and left us clues to help us find what they wrote.

First - Map and Clue Analysis:

Inspect any "Achtung" notice board marked on the map and find the article marked with this symbol. The article mentions 4 sectors – mark all of them on your map.

Second - Area Reconnaissance:

In these 4 sectors, inspect the houses from the outside and find the one without this symbol. Then enter the house and find the written title and artist of the painting.

Third - Infiltration and CSC Retrieval:

Locate the officer responsible for District 28Z and, without presenting your documents, begin a conversation by saying: "Hello, my friends and I have a wager – could it be true that you own one of the finest paintings by artist, namely painting?" Convince him to show you the painting.

When the safe has been unlocked, distract the guard to create an opportunity to take this Nazi **Cipher System Calculator (CSC)** from the safe. Once you have it, end the conversation, leave the precinct as quickly as possible, and escape District 28Z.

Fourth - Bonus Objective for MI6 Elite Operative Status:

Next, proceed to the Tavern in Sector F16. Behind Hitler's painting you will find a coded message revealing the **sector** and **house door code** of a Nazi Cipher Machine "Wähler 9-4". Examine your **CSC**. It contains the clue needed to decipher the Tavern's message. Then proceed to the Cipher House, insert the **CSC** into the Cipher Machine, and obtain the 4-digit cipher code. Memorise the code, take the **CSC**, and leave the location without the guard noticing.

Fifth - Escape from the Town:

Once this is done, proceed to Sector D12 and escape safely to Switzerland through the old mines. At the Swiss Command Centre, hand the **CSC** to the person on duty. Once you have completed this, you will be granted MI6 Agent status and access to top secret information related to the mission campaign "Amun-Ra and the Holy Grail of Ancient Civilisations." Wishing you the best of luck, Mission Commander

Simon R. Smith
